How unfair!

Martin Neitzel

Marshlabs

Initial Findings

Recent studies show that not all numbers are created equal. Some are apparently greater than others:

	0	1	2	3	4
0	0	0	0	0	0
1	1	0	0	0	0
2	1	1	0	0	0
3	1	1	1	0	0
4	1	1	1	1	0

Conclusions and Summary

Ain't that unfair? For quantitative evaluations, further grants are required.
